

# National Committee of Greece

*“The Next Generation Network (NGN) of Greece is a part of the Cigre National Committee of Greece and its mission is to engage the next generation of power engineers (students and young professionals engineers) actively with Cigre’s activities and integrate them to the worldwide scientific community.”*

Our aim is to inspire and motivate young power engineers to take their first steps in a fast-moving environment along with Cigre as a strong stable guide and keep them updated of all the latest developments in the power systems sector, which will permit them to turn into power system experts.

*“Be at the heart of the latest developments in the fields of electrical power engineering”*

## Mission

- ✓ Provide technical resources to next generation of power engineers to develop their knowledge and skills.
- ✓ Provide networking opportunities between young professionals and students within the power industry and with colleagues across the world.
- ✓ Provide access to students and young professionals engineers to CIGRE Working Groups both nationally and internationally (and opportunity to participate in technical works of CIGRE).

Joining NGN Greece means access to the world of Cigre with many resources, participations, opportunities, and great benefits:

- ✓ Access to state-of-the-art technical knowledge and information through CIGRE’s ELECTRA journal and e-CIGRE website (CIGRE publications to CIGRE’s online library).
- ✓ Monthly newsletter includes information on upcoming events, reports from recent events and news from around the CIGRE organisation.
- ✓ Able to attend NGN organised events in Greece such as technical visits, lecturers, webinars and tutorials, as well as CIGRE and CIGRE-GR events.

## Temporary Steering Committee

- 1) Christos – Spyridon Karavas
- 2) Vasilis Lakiotis
